United States Antimony Corporation Further Expands Alaska Mining Land Ownership Position with Acquisition of Stibnite Creek Antimony Claims

"The Critical Minerals and ZEO Company"

THOMPSON FALLS, MT / ACCESSWIRE / November 6, 2024 / United States Antimony Corporation ("USAC", or the "Company"), (NYSE:UAMY), a leader in the processing of critical minerals, has announced today that it has successfully staked and recorded an additional 24 new claims totaling 3,840 acres (6 square miles) on Alaska State lands near **Stibnite Creek**, located in the **Tok area** of Alaska. This strategic move places UAMY in a known antimony-rich region along the Alaska Highway, approximately 200 miles southeast of Fairbanks. With this addition, the Company now controls a total of 93 claims totaling 14,880 acres in Alaska, most of which is either associated with antimony or other critical minerals.

The newly claimed area is rich in historical mineralization, including stibnite, an important source of antimony. In addition to antimony, the Tok region has been noted for deposits of **gold, silver, copper, and zinc**. Historical exploration in the region also uncovered smaller veins containing galena, tetrahedrite, sphalerite, and magnetite, further highlighting the geological significance of the area. This expansion is part of UAMY's ongoing efforts to secure and develop its own domestic sources of critical minerals essential for military, aerospace, quantum computing, and energy storage applications. Successful exploration of these claims would allow UAMY to become a fully integrated company with raw ore source rock, flotation capabilities, and the only U.S. smelter.

As the only antimony smelter in North America and amidst China's recent announcement banning all antimony international exports, UAMY's expansion into the Tok region further strengthens the company's strategic position as an integrated antimony supplier in an effort to support U.S. initiatives for securing critical minerals.

About USAC:

United States Antimony Corporation and its subsidiaries in the U.S. and Mexico ("USAC", the "Company", "Our", "Us", or "We") sell processed antimony, zeolite, and precious metals products in the U.S. and Canada. The Company processes antimony ore primarily into antimony oxide, antimony metal, and antimony trisulfide. Our antimony oxide is used to form a flame-retardant system for plastics, rubber, fiberglass, textile goods, paints, coatings and paper, as a color fastener in paint, and as a phosphorescent agent in fluorescent light bulbs. Our antimony metal is used in bearings, storage batteries, and ordnance. Our antimony trisulfide is used as a primer in ammunition. In its operations in Idaho, the Company mines and processes zeolite, a group of industrial minerals used in soil amendment and fertilizer, water filtration, sewage treatment, nuclear waste and other environmental cleanup, odor control, gas separation, animal nutrition, and other

miscellaneous applications. We recover certain amounts of precious metals, primarily gold and silver, at our plant in Montana from antimony concentrates.

Forward-Looking Statements:

Readers should note that, in addition to the historical information contained herein, this press release may contain forward-looking statements within the meaning of, and intended to be covered by, the safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements are based upon current expectations and beliefs concerning future developments and their potential effects on the Company including matters related to the Company's operations, pending contracts and future revenues, financial performance, and profitability, ability to execute on its increased production and installation schedules for planned capital expenditures, and the size of forecasted deposits. Although the Company believes that the expectations reflected in the forward-looking statements and the assumptions upon which they are based are reasonable, it can give no assurance that such expectations and assumptions will prove to have been correct. The reader is cautioned not to put undue reliance on these forward-looking statements, as these statements are subject to numerous factors and uncertainties. In addition, other factors that could cause actual results to differ materially are discussed in the Company's most recent filings, including Form 10-K and Form 10-Q with the Securities and Exchange Commission.

Forward-looking statements are typically identified by words such as "believe," "expect," "anticipate," "intend," "outlook," "estimate," "forecast," "project," "pro forma" and other similar words and expressions. Forward-looking statements are subject to numerous assumptions, risks and uncertainties, which change over time. Forward-looking statements speak only as of the date they are made. Because forward-looking statements are subject to assumptions and uncertainties, actual results or future events could differ, possibly materially, from those anticipated in the forward-looking statements and future results could differ materially from historical performance.
